Extensibility: Create amazing integrations

The screenshot displays the WorkWithPlus application interface. The top header is blue with the 'WORKWITHPLUS' logo, a menu icon, and the 'Inventory' title. On the right of the header are icons for favorites, notifications, a user profile, and settings. A left sidebar shows the user 'Administrator User' and a list of 'HOME PAGES' including 'Dashboards', 'Simple Cards Icons', 'Main Card with KPIs', 'Cards Circle Progress', 'Main Card with Progress Circle', 'Icon Cards', 'Colored Cards', 'Banner and Sections', 'Modules', and 'ARTIFICIAL INTELLIGENCE' with an 'AI Assistant' option.

The main content area features an 'Inventory' table with columns: Id, Full Name, Nickname, Birth Date, Hobby, Gender, Company, and Country. The table contains 10 rows of data. Above the table are buttons for 'Insert', 'Excel', 'PDF', 'Import Excel', 'Import CSV', and a 'Select columns' dropdown. A search bar is located above the table. An 'AI Assistant' chat window is overlaid on the bottom right of the table, containing a welcome message and a text input field.

Id	Full Name	Nickname	Birth Date	Hobby	Gender	Company	Country
1	Romero Ana <span>delayed order</span>	Annie	01/24/83	Scopare	Female	Dvelop	Brazil
2	Petersona Johao <span>new</span>	Johannil	02/25/97	Play tennis	Female	Salto Grande	Uruguay
3	Garcial Michael	Victor	12/21/75	Watch Football	Female	GeneXus	Argentina
4	qwe Paul	Paul	03/04/81	Go to cinema	Male	TCS	Brazil
5	Carlson John <span>new</span>	AAAAAA					
6	Peterson Loif	Rights					
7	Herrera Nicholas	Nick					
8	Hemingway Eugenia <span>new</span>	werwer					
9	Herrera Michael	Miguel					
10	Hault Sebastian	Seba

# How we do it?

*"List accounts with balance equal to 500,000 +/- 10%"*

*"View sales evolution from last 5 years in a timeline chart"*

# Security & Privacy

- Powered by Globant Enterprise AI
  - LLMs used by APIs → info is not used to train models
- Integrated with GAM permissions & definitions
  - share your current security definition
    - example: reuse same access permissions of list screens
  - define permissions by entities/attributes/modes

AI Assistant

**Start: Demo time!**

# Demo Case study: Banking

- Transactions:
  - Customer
  - Country
  - Bank
  - Currency
  - Account
  - Card
- Person transaction: +2,000,000 records
- KB language: English

# Case study: goals

1. Enable WorkWithPlus AI Assistant
2. Configure and customize the AI Assistant
3. Query your data
4. Query your data in Japanese!

# Case study: extensibility

- Final users can already:
  - a. Use intent-based navigation
  - b. Query their data in natural language and generate powerful insights
  - c. Create custom dashboards
- What's next? Extend its capabilities to:
  - Access external sources**  
E.g., "How many dollars are 10,000 yen?" → Connect to a currency exchange API
  - Trigger specific actions**  
E.g., Change a card type from credit to debit → Execute a procedure with business logic

# Case study: security

- Final users can already:
  - a. Use intent-based navigation
  - b. Query their data in natural language and generate powerful insights
  - c. Create custom dashboards
- What's next? Add security:
  - Define permission by transaction**  
E.g., "User A can't query about "Cards"
  - Define permission by attribute**  
E.g., "User B can't see "AccountBalance" attribute"

**End: Demo time!**
